## 1938 PRICE LIST

We extend greetings with our annual Spring Gladiolus Price List, containing some of the standard varieties that have stood the test of time and popularity and have added many of the newer ones you will want to grow in your Gladiolus Garden this year.

Every transaction is personally performed by the owner or by help with years of experience. This assures our customers of highest quality stock that is possible to grow, with a minimum chance of errors in filling orders.

If, at any time, our customers find any fault with their dealings with us, we deem it a very personal favor to be able to adjust the error to their entire satisfaction.

The gladiolus can be successfully grown in most any part of our U. S. They are easily grown and respond wonderfully to a little attention, such as keeping them free of weeds, and cultivation and fertilizer.

**Thrip.** For the last several years it has been very necessary to guard against Thrip. Soak all bulbs planted, be it many or few, in Bichloride of Mercury (Corrosive Sublimate) for Thrip and disinfectant, use 1 ounce to 7 gallons of water and soak 8 to 10 hours in stone crock or wooden vessel. Plant with bulbs are wet or dry. I prefer to soak them over night.

State Gladiolus Certificate of Inspection accompanies each shipment of bulbs, as the laws of most states require all bulbs to be inspected.

**Sales Tax:** Only orders from Ohio which are for resale of bulbs or flowers will add 3% sales tax.

Cash with order or 25% or 1/4 down and balance C. O. D. at time of shipment. Five Bulbs at 10 rate, 25 bulbs at 100 rate. Please make your order total at least \$1.00.

**FREE.** Enclose with your order names and addresses of five or more of your gladiolus friends; we will enclose a surprise gift of bulbs.
